## Surviving Florence

Nearly a week after the storm and we still have parts of our community of knitters and friends that cannot leave their homes. Surviving Florence has become history for some of us and remains to be seen for others. If we can do anything for you let us know. Our prayers and best wishes go out to you all.

The storm has touched us all. Our visit from Velva which was to be a full week, turned out to be one day. The mandatory evacuation dictated that she leave almost as soon as she arrived, but we are thankful for the one day we had to visit with her.

Our newsletter this month is about new items in the store that you might like to hear about. Some are brand new while others are reorders with a little different twist.

We now have a small selection of colors in sock weight that you might find interesting: Murrells Marsh, Myrtle Waves,

and Sea Glass. We also have these same colors in mini skeins that can be used separately or in a combination of colors.

We regret that Ingrid will not be able to start the CAL with you tomorrow. She has been evacuated from her home, again! However, if you are ready and able to get here, Martina will help you get started, and the official start will be delayed until the 28 when Ingrid will be here. The Snow Drops Slouch Hat will start Friday Sept 28. The CAL starts at two and ends at 4. The second day will be announced by Ingrid next week. The project uses one skein of Rios by Malabrigo.
