

Spring is in the air!

The weather is warming up and some of us are ready for a cooler fiber with which to knit or crochet our summer projects. Visit our website for a full list of yarns that will suit your every need.

Did I hear someone ask about "angora?"

The **Angora rabbit** (Turkish: *Ankara tavşanı*), which is one of the oldest types^[1] of domestic rabbit, is bred for the long fibers of its coat, known as *Angora wool*, that are gathered by shearing, combing, or plucking. Because rabbits do not possess the same allergy-causing qualities as many other animals, their wool is an important alternative. (Wikipedia)
